PLATE INSTALLATION SUPPLEMENT**

SUPPLEMENT FOR SPREAD-BORE SYSTEMS

Please read both your PERFORMER (RPM) NITROUS SYSTEM MANUAL and this PLATE INSTALLATION SUPPLEMENT before installing your Edelbrock Nitrous System. If you have any questions or comments, please contact our **Technical Hotline at: 1-800-416-8628** from 7am - 5pm, Monday through Friday, Pacific Standard Time or e-mail us at **Edelbrock@Edelbrock.com**. Please fill out and mail your warranty card.

Your spreadbore nitrous plate mounts differently than other Performer Nitrous Systems. The standard plate installation procedure is to install the nitrous plate so the fuel feeds from the front and the nitrous feeds from the back. Due to different machine processes, your spreadbore nitrous plate feeds the fuel from the back of the plate and nitrous from the front. Follow the same steps as outlined in your owners manual for solenoid installation, just keep in mind that the fuel solenoid and lines need to be routed from the back of the engine and the nitrous solenoid and lines need to feed from the front.

All other installation procedures should be performed as outlined in your owners manual.
